FOR IMMEDIATE RELEASE
July 24, 2009

First Internet Solutions Adds Account Bill to *equip*[®] Product Suite

Sheboygan Falls, WI -- First Internet Solutions, LLC, a recognized leader in hosted web-based Property and Casualty processing software announces the addition of the *equip*[®] Account Bill application.

The comprehensive web-based Account Bill application supports FIS' *equip*[®] Policy Processing application or can be integrated to existing legacy policy systems. The Account Bill application allows carriers to organize and maintain multiple policies across lines of business with different effective and expiration dates making it easier for the insured to understand their billing statement.

The system automatically assigns the account number and establishes the account relationship in the policy processing system with default values of Direct, Insured, Full Pay, and Cash. These values are easily maintained in tables and can be modified by your accounting department.

Billing/Accounting Features and benefits

- Automates the billing cycle
- Designed to accommodate flexible billing and payment plans
- Enables rapid integration with external accounting systems
