The Bremen Farmers' Mutual Insurance Company Strengthens Relationship with Agents by Delivering Web-based Quoting and Inquiry Capabilities

(Sheboygan Falls, WI) – First Internet Solutions, LLC, a recognized leader in hosted web-based Property & Casualty processing software, announces the addition of The Bremen Farmers' Mutual Insurance Company, Bremen, Kansas to its client list to provide quoting and inquiry capabilities.

In a recent survey Bremen Farmers' Mutual asked their agents what type of automation they needed. Not too surprising; they overwhelmingly requested a web-based quoting and inquiry system. "Being able to obtain an accurate quote, submit applications and photos, and get online replacement cost valuations scored high with our agents as did the ability to inquire online to find policy, claim and billing information." states Curtis Holle, Executive Vice President. "They also wanted this in an intuitive, user-friendly design."

Bremen selected First Internet Solutions based on their ability not only to support their future processing needs but also to assist in maintaining their legacy policy and claims system. "We inherited a wealth of knowledge and experience with this new relationship," explains Holle. "First Internet Solutions and its associate company Alternative Solutions Inc. (ASI) offer the unique business model we were looking for. They offer leading edge software that can standalone or interface to our legacy system. They understand the investment that companies have in their legacy systems and have built products with this in mind."

About The Bremen Farmers Mutual Insurance Company

(Bremen, KS) In 1878 a group of Lutherans in the area banded together to help a neighbor after a fire loss forming the "Friendly Fire Society". Ten years later from these roots, the Bremen Farmers Mutual Insurance Company was born. Today the company continues the spirit of a mutual insurance company providing home, farm, dwelling fire and inland marine protection for the state of Kansas.

About First Internet Solutions

First Internet Solutions, founded in 1999, offers a strategic business choice of SaaS or traditional licensing of their Property & Casualty Equip® product suite. Carriers can choose to enhance their legacy system or replace it by selecting uniquely tailored web-services and applications. Equip® allows carriers to extend their application process to agents in the field, streamline their underwriting process, and increase their competitiveness in the marketplace. First Internet Solutions employees are experienced on multiple platforms and databases and have an average of 20 years of property and casualty insurance experience.
